This presentation may include forward-looking statements, which are based on Flow Traders’ current expectations and projections about future events and are not guarantees of future performance. Forward looking statements are statements that are not historical facts, including statements about our beliefs and expectations. Words such as “may”, “will”, “would”, “should”, “expect”, “intend”, “estimate”, “anticipate”, “project”, “believe”, “could”, “hope”, “seek”, “plan”, “foresee”, “aim”, “objective”, “potential”, “goal”, “strategy”, “target”, “continue” and similar expressions or their negatives are used to identify these forward-looking statements. By their nature, forward-looking statements involve known and unknown risks, uncertainties, assumptions and other factors because they relate to events and depend on circumstances that will occur in the future whether or not outside the control of Flow Traders. Such factors may cause actual results, performance or developments to differ materially from those expressed or implied by such forward-looking statements. Accordingly, no undue reliance should be placed on any forward-looking statements.

Forward-looking statements speak only as at the date at which they are made. Flow Traders expressly disclaims any obligation or undertaking to update, review or revise any forward-looking statements contained in this presentation to reflect any change in its expectations or any change in events, conditions or circumstances on which such statements are based unless required to do so by applicable law.

Financial objectives are internal objectives of Flow Traders to measure its operational performance and should not be read as indicating that Flow Traders is targeting such metrics for any particular fiscal year.

Flow Traders’ ability to achieve these financial objectives is inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond Flow Traders’ control, and upon assumptions with respect to future business decisions that are subject to change. As a result, Flow Traders’ actual results may vary from these financial objectives, and those variations may be material.

Efficiencies are net, before tax and on a run-rate basis, i.e. taking into account the full-year impact of any measure to be undertaken before the end of the period mentioned. The expected operating efficiencies and cost savings were prepared on the basis of a number of assumptions, projections and estimates, many of which depend on factors that are beyond Flow Traders’ control. These assumptions, projections and estimates are inherently subject to significant uncertainties and actual results may differ, perhaps materially, from those projected. Flow Traders cannot provide any assurance that these assumptions are correct and that these projections and estimates will reflect Flow Traders’ actual results of operations.
